

Sustainable Development Application Form

*Please email this form in MS Word format along with detailed financials of proposed projects to
Rev. Vy Nguyen, Executive Director (vy@weekofcompassion.org).*

Submitting Partner: <i>AGRICULTURAL MISSIONS, INC. (AMI)</i>		April 14, 2021	
Address: <i>475 Riverside Drive, 15th Floor</i>	City: <i>New York</i>	State: <i>NY</i>	Zip Code: <i>10115</i>
Name of Contact: <i>Winston Carroo</i>		Title: <i>Coordinator for International Programs</i>	
Phone Number(s) <i>(202) 415-8014</i>		E-mail Address: <i>wcarroo@ag-missions.org</i>	
Project Name, Local Country Partner, and Location: <i>Program: West Africa Initiative (WAI) Project: PROMOTING GENDER RIGHTS THROUGH THE YOUTH AGRICULTURE PROJECT IN LIBERIA AND SIERRA LEONE—Preventing Violence Against Women and Supporting Girls’ Education</i>			
Local Country Partners: <i>Village to Village Federation (Sierra Leone) and West Africa Initiative of Liberia (Liberia)</i> <i>Locations: 5 Districts in Sierra Leone (Tonkolili, Bombali, Port Loko, Kambia and Kenema) and 5 Counties in Liberia (Grand Bassa, Bomi, Nimba, Bong and Grand Gedeh)</i>			
Partner’s History/Relationship with the Project: <i>AMI has been intimately involved in the WAI program since its inception in 2008, in response to the rebuilding and reconstruction efforts following the civil wars in Liberia and Sierra Leone. AMI was asked by its ecumenical partners in the USA to engage their local counterparts in the development and implementation of a rural development program that addresses the needs for food security and community centered social and economic development. Since that time, AMI has been working with the Council of Churches in Sierra Leone (CCSL) and the Village to Village Federation (V2V) (Sierra Leone), and the West Africa Initiative of Liberia (WAIOL) in the successful implementation of the program in both countries. This resulted in significant increases in local food security, increased family incomes and improved nutrition and access to safe water. In addition, the program now also focuses on developing the human resources and institutional capacity of the partners to assume full responsibility for the program. The urgent problems of high youth unemployment and gender based discrimination and inequalities, particularly in rural areas, led to the need for this project, within the framework of the overall WAI program. This project addresses the most urgent long- term challenges facing both countries. In 2019 the Youth Agriculture Program was initiated in three villages in each country that aims to establish sedentary farms that would provide youth with livelihood opportunities and promote ecologically sound farming practices while educating the communities on the issues of climate change and building resilient communities.</i> <i>The impact of the COVID -19 pandemic led to the decision by partners to integrate the Youth Agriculture Project to focus on the potential impacts of the disease on rural communities in terms of awareness and prevention measures and food security and to address gender disparities. Even in normal times, women and girls suffer overt discrimination with respect to access to opportunities for employment and education which may take the form of physical and mental/psychological abuse. In times of crises these abuses increase and this pandemic is no different. Addressing gender-based violence against women and girls’ education will include both the existing youth groups initiated in 2020 and the new ones planned for 2021. Based on the lessons learned during the EBOLA disease crisis in 2014- 2016 and its impact on rural communities, the importance and urgency of these modifications are justified and appropriate. Integration of these aspects of the program is rational, as there is significant overlap in terms of communities and personnel for related activities of the project, thus maximizing the use of available resources.</i>			
Description of Project			

Name of Project and Purpose (agricultural, health, water, micro-credit, education, community development, etc.- and how it might address at least one of the **17 United Nations' Sustainable Development Goals 2015-2030**):

Name of Project: *West Africa Initiative Youth Agriculture Project- YOUTH LED RESPONSE TO FOOD SECURITY AND GENDER BASED VIOLENCE AND DISCRIMINATION.*

PURPOSE: Engage community participants in the Youth Agriculture Program in COVID-19 Food Security and Gender based discrimination through community education and awareness and school support for girls.

This project addresses United Nations' Sustainable Development Goals 1 (Zero Hunger) and 3 (Good Health and Well Being) 4 (Inclusive and quality education) 5 (Gender equality and empowerment of women and girls)

The current situation: *The feared increase in cases of the COVID-19 that was present at the onset of the pandemic a year ago has not materialized in either country. As of April 13, 2021, the total number of infections in Liberia was 2047 (41 per 100,000 with 95 deaths (1.7 per 100,000), while in Sierra Leone there was a total of 4008 cases (51.3 per 100,000) and 79 deaths (1.0 per 100,000). This can be partially attributed to the government instituted lockdown measures that closed schools and markets and curtailed commerce and trading as well as farming activities in both countries. These measures resulted in the expected shortage in food production and increased food insecurity. The Youth Agriculture Program engaged the youth in the farming activities to address this problem of food insecurity. The youth also decided to address the persistent problem of gender-based inequities within their communities.*

In both Liberia and Sierra Leone, pervasive gender-based inequities are historical, social, and cultural practices which severely limit the ability of women to gain access to educational and occupational advancement and full participation in the development of their communities. An assessment of the WAI communities on women's rights and empowerment indicates that acts of violence against women do not only take place in the homes, but a significant number of violations occur in workplaces, schools and even places of worship. School attendance rates are lower for girls when compared to boys resulting in women with lower literacy and educational levels when compared to men. Most families cannot afford to fully educate all their children and preference is often given to boys in terms of school attendance and other educational opportunities. The World Bank reported that, between 2013 and 2017, 60% of the adolescents who dropped out of school were females, citing economic and cultural factors as major causes for this situation. Although there have been improvements with respect to legal reforms and increased gender awareness and activism, entrenched cultural beliefs and practices that discriminate against women and girls, and stereotypical perception of women and girls remain a stumbling block in achieving Gender Equality and Women's Empowerment. Women and girls in rural communities are more vulnerable to gender-based violence and other inequalities than their urban counterparts due to the lack of awareness in the general population and lack of supportive social and legal services. In cities and large towns such services are provided by the governments and non-governmental organizations working on this issue. Through the West Africa Initiative (WAI) program, Agricultural Missions, Inc. (AMI) and its local partners have been working with farmers' groups and rural communities for the past ten years. This work included training and material support in agricultural production and marketing, water wells and hand pump installation and repair, grain storage facilities and microcredit for women.

Target Population (children, women, farmers, urban poor, etc.- priority will be given to projects that enable the empowerment of women and children):

Primarily youth, with emphasis on the participation of women and girls, in rural villages who are not likely to be serviced by government and non-governmental organizations. Youth from these communities will be trained and empowered to address needs brought on by the Corona Virus, with deliberate emphasis on the inclusion of women in decision making and school support of girls.

How many persons are/will be served? (Please give as specific a figure as possible)?

In the six communities in each country, 300 men and women leaders and community members attend awareness sessions on gender-based violence and 180 girls supported with school supplies and peer counseling. 800 persons to benefit from the food security activities.

Key Objectives:
<u>Objective 1:</u> Gender based violence reduced in 6 communities in each country.
<u>Objective 2:</u> 180 girls enrolled in schools supported with uniforms and school supplies and peer counseling.
<u>Objective 3:</u> One year Emergency food reserve established in six communities.
<u>Objective 4:</u> 3 new youth groups added to Youth Agriculture Program and 90 youth trained in each country. (Concurrent with Objective 3)
Key Activities:
<u>Related to objective 1:</u> (a) Conduct Training of Trainers (TOT) Workshops for facilitators, staff, and community leaders in Gender Based Violence Prevention, using trainers from government agencies, NGOs and police; (b) Conduct community- based awareness sessions for men and women; (c) Establish “community watch” groups to monitor incidents and promote mediation and provide counselling and advice to victims; d) Establish links between communities and support services and organizations.
<u>Related to Objective 2:</u> (a) Work with local community stakeholders (parents, schools, community leaders to identify girls who are in need and at risk for dropping out of school; (b) Establish transparent selection process and work with stakeholders to select girls for support; (c) Provide support for uniforms, books, and school supplies; (d) Establish peer counseling units for teenagers in high schools.
<u>Related to Objective 3:</u> (a) Consult with youth and village leaders to secure access to land for 3 new youth groups; (b) Youth organize themselves in work teams; (c) Youth cultivate and harvest and store crops; (d) Distribution of food at appropriate times, based on guidelines developed; d) Emergency food reserve replenished annually.
<u>Related to Objective 4:</u> (a) Land secured from community leaders, groups selected and submit operational plans; (b) Youth attend training in farm planning for ecological farming led by youth previously trained; (c) Initiate establishment of farms using the farmer field school methodology led by youth trained in previous year.
Duration of Project: May 1, 2021 to April 30, 2022
Project Budget
Total Budget: \$60,795
Amount Requested from Week of Compassion: \$20645– Designated for THE WEST AFRICA INITIATIVE
Is this a one-time request or an on-going request? One time request for 12-month period indicated
Please provide a cost breakdown for the requested funds (A detailed, itemized budget is required. May be provided on a separate sheet, if easier): See Attached Excel file for comprehensive budget
If this project has been funded previously or is in the same geographical area, please specifically state when and how much was granted: In 2016 - \$30,000 and 2017-: \$27,600 – for water (wells and pumps) – 2010- \$29,590 – for Youth Agriculture Project. 2020-COVID 19 Pandemic Education and Food Security-\$40,297. Same geographic area but not same project.
Dates and project names of previous approved proposal submissions within the last 5 years: See above

Other Funding Sources: Growing Hope Globally (GHG) \$20,000; PCUSA \$12,500; Agricultural Missions \$2,820; Local Contributions \$4830. All confirmed	
How do you plan to monitor, evaluate, and report back to Week of Compassion? <i>(Please note that future funding is contingent upon reporting, and that reports should be made between 6 months- 12 months after funding. In addition to reporting, please provide at least one story of transformation and photos.)</i>	
<i>Ongoing monitoring is an integral part of the program implementation plan, conducted by groups (self –evaluation) and local partner organizations. The local Board of Directors of each organization has established an evaluation and monitoring committee which will be active in this process. There is also a mid-year and end of year evaluations conducted by AMI. Mid-year and end of year reports are submitted in December-January and May-June.</i>	
Have all reports and stories from previous projects been submitted to WoC? <i>Yes.</i>	
If granted, is there a deadline by which to receive funding? <i>May 15, 2020.</i>	
If granted, please provide full information for how (wire transfer, check, etc.), where, and to whom funds should be sent. <i>Wire transfer details same as previously used: Details Provided upon Request</i>	
Application prepared by: <i>Winston Carroo</i>	Contact info: Email: wcarroo@ag-missions.org . Phone <i>202-415-8014</i>
